Parched skin gets a moisturizing boost with the Hydro-Fill Facial (\$180, 60 minutes) at **Yasmine Djerradine Institut de Beauté** (New York City). The facial is ideal for dehydrated, dry, and sensitive skin. It uses technologically advanced hyaluronic acid products from Meder Beauty. It involves a thorough massage with Energy Cleansing Emulsion followed by the application of a powerful, yet

soothing Enzyme Mask that is suitable for even the most sensitive skin. An Antioxidant Serum then helps oxygenate skin and prepare it for the Hydro-Fill Concentrate and the Hydra-Fill Mask, which increases the absorption of the hyaluronic acid-infused concentrate and helps restore optimal moisture levels to the skin. The facial concludes with a dollop of Sous-Crème Derma-Fill, which contains hyaluronic acid and seaweed extract and provides a final antioxidant-rich facial fix for clients who are dealing with dry winter skin woes.
